

Steel / Enamel Baths and Trays

Bette steel/enamel baths and trays are manufactured exclusively from the naturally based raw materials of steel, real glass and water that are available on our planet in almost inexhaustible quantities. Steel/enamel baths and trays are therefore **100% recyclable**. Ultra-modern production processes enable the steel/enamel material to be transformed into an extremely durable, robust, long-lasting and recyclable product whose surface can only be destroyed by brute force.

Since the Bette company was founded in Delbrück in 1952, several million baths have left the steel/enamel bath manufacturers' factory.

Presently more than 50,000 baths and showers are produced each month in the modern factory. Around 45 percent are exported, primarily to European countries, but also to Southeast Asia. Bette is a specialist for steel/enamel. With shaping and enamelling techniques exclusive to the company, around 500 different models are produced by about 270 employees; 1000 colours can be chosen from.

Bette specialises in the production of steel/enamel baths and shower trays. A modern and individually controlled Bette production process enables the manufacture of practically any shape and colour of bath or tray. The length, width and depth of almost every Bette bath can be altered to fit in with the planning considerations of individual bathroom designs.. Bette's unique product range variety, accommodating a very wide range of tastes and requirements, is very appealing.

Bette offers the right solution for all situations. The current range consists of over 500 baths and shower trays. Oval, circular, corner, large, small, built- or freestanding - we have the answer.

The Bette comes with Long service life - **30 year** guarantee, Extremely sturdy thanks to the use of **titanium steel**, High impact **strength** and **tough**, Much more **durable** than iron, marble or plastic, **Skin friendly** and no loss of warmth through the material, Colour stable and **non-fading** even when subjected to **UV rays**, **Resistant** even to aggressive fluids and scouring agents, **Inorganic** surface is not a breeding ground for bacteria

Safety in the bathroom

So that you stand on steady legs: a special quartzsand mix can be permanently fired onto the enamel surface of all baths and shower trays; this prevents slipping on the one hand, yet on the other does not diminish the pleasant quality of the texture of the surface.

BETTE WHIRLSYSTEMS

Whirl baths from Bette make a real contribution to your personal well-being. Bubbling water ensures pleasant relaxation or gets you fit for everyday life! That is a particular luxury, to which you should also treat yourself

Beauty begins on the surface with

BETTEGLAZE®

The BETTEGLAZE® enamel technology was developed by Bette in conjunction with Bayer AG and ensures superior colour brilliance as well as a visually smooth and easy-care surface. The BETTEGLAZE® PLUS coating thus provides long-lasting protection against dirt and limescale deposits.
