## PLAYGROUND COLLECTION

[Join Our Mailing List!](#)

Dear All,

Schoenwald porcelain from Germany constantly provides perfect solutions for various food service concepts. Playground is a versatile, open range, which is regularly updated and compiles the latest trends in food presentation for you. Discover unusual items and accessories The **new PLAYGROUND collection** offers new concepts in stoneware, wood, slate, melamine, cast iron and glass.

- [Fine Sign Language](#)
- [New Simplicity](#)
- [Sublime Spectacle](#)
- [Paper Mates](#)
- [Amuse Tower](#)

### FINE SIGN LANGUAGE

The extraordinary aesthetics of the black platter made from stoneware are inspired by Japanese calligraphy. Harmonically combined with the plain board made from polyester with an oak look, visual and culinary surprises await you.

### NEW SIMPLICITY

Keep it simple is the motto.

The Loft presenters made from oak transmit the simplicity of milking stools into modern design. Glass carafes, stackable glass bowls and bread bags made of a durable natural material highlight the easiness of the arrangement.

**Bread Paper Bag Round**

**Wooden Plate Flat Round**

**Loft Presenter on Stands 8cm**

## SUBLIME SPECTACLE

**Plateau plate** made of matte black stoneware. The structure of the dish surface is reminiscent of arid earth. An expressive presentation surface for the succulence of 'honest' food. Here it is paired with the ANANTI wooden board in walnut.

## PAPER MATES

The stylistic purity of the **disposable tableware** offered by Playground is made of sustainable materials and is 100% biodegradable. The plates and bowls are waterproof, grease-resistant and suitable for microwaves.

## AMUSE TOWER

### Vertical food presentation

**Amuse tower** made of temperature-resistant borosilicate glass in premium quality. Stack or use individually - ideal for a 4-course menu or a culinary quartet.

Schoenwald now also offers an alternative "metal effect" colours in gold, platinum and copper. They present a real alternative to precious metals, especially if they are used as a full rim décor on plates, and the pricing is similar to any other standard ceramic colour we use.

We would be glad to assist if you have any queries. We look forward to your kind response.

Sincerely,

Raman Grover
