

# WMF - CHAFING DISHES

**SOFT SENSATIONS PVT. LTD.**

Greetings!

There's no limit to perfection at your buffets. The New WMF Hot & Fresh GN 1/1 Chafing Dish, along with Hot & Fresh Basic Round & GN 2/3 Chafing Dishes, combine premium quality with outstanding variety. They lend your buffet even more flexibility, freshness and function.

Reliable induction technology ensures optimal temperature regulation for dishes due to evenly distributed heat of the base. The encapsulated Transtherm base works well even on standard heat sources like hot plates and fuel cans. Made from high-quality stainless steel and fitted with a transparent glass lid, it has an intelligent condensation recirculating system which gives any buffet an elegant touch.

**HOT & FRESH**

**QUADRO - COLD BUFFET SYSTEM**

Functionality and flexibility are key for **WMF Quadro**, as no two buffets are the same.

Cooling, stacking, combining and serving on multiple levels, everything must be quick and seamless. WMF Quadro fulfils this requirement with a range of inserts in GN format, such as porcelain bowls, plates made from different materials and woven-look baskets. Themed culinary islands can be set up with different attachments, bridges and serving stands.

The LEDlight adapters provide an additional optical highlight. These can be fitted on the frames of the modules and provide the desired mood with LED light units in various dimmable light colours.
