

WMF - ECOMPACT Roasting & Steaming System

SOFT SENSATIONS PVT. LTD.

Greetings!

Steam cooking has been scientifically proven to be the healthiest way of cooking known to man. Vegetables, meat and other foods become a mouth-watering treat with the help of **WMF Ecompact** steamer. This particular way of cooking preserves and intensifies the flavour, and the aroma remains completely intact.

WMF Ecompact steamers are meticulously developed and are made from sophisticated and proven materials.

The frame of the steam cooker is made from material Cromargan® and is fitted with a **TransTherm® universal base**. This makes it suitable for all types of hob, including induction. A stay-cool handle makes it easier to handle, and the **heat-resistant glass lid** and **built-in thermometer** ensure that cooking and steaming is a real joy. The perfectly designed steaming basket can be used either with or without an edge to make placing food in hot steam safer. The advantages of **multi-layer cookware** is evident as one can cook more than one thing in the steam at any one time. The two steaming inserts can be used together or individually. The steaming inserts can be divided as needed by the dividers. The hot steam isolates each individual aroma so each food retains its own distinct taste.

COMPONENTS OF ECOMPACT

- **Thermometer** - To monitor cooking temperature, so that vitamins are preserved and the meat or fish remain tender and moist.
- **Glass Lid** - Temperature resistant up to 200 degreeC. The special silicone seal ensures that the lid fits tightly & prevents any noise should the lid be lifted by the steam during cooking.
- **Low insert with 2 dividers** - Capacity 3.6 Ltrs.

- **High insert with 2 dividers** - Designed for larger portions of food (up to 10cm high). When used on its own, capacity is 5.5 Ltrs.
- **Silargan Rectangular Roaster** - Can be used like a conventional roaster for roasting, braising and stewing as well as souffles or bakes. The roaster can be used on the stove or in the oven at temperatures up to 250 degree C.

Specifications:

- Article no. 21.3628.4789
- Silit Ecompact - 5 pcs.
- Size: 35.6cm x 33.3cm x 18.4cm
- Capacity: 6.7 Ltrs.
- Colour : Energy Red
- Material: Silargan
- Induction-compatible
- Suitable for glass-ceramic, gas, electric and induction stoves
- Ovenproof
- Heat resistant up to 250 degreeC without lid or 180 degreeC with lid
- Glass lid with silicon seal
- Dishwasher safe
