

# WMF - (NEW) SITELLO

**SOFT SENSATIONS PVT. LTD.**

Greetings!

With the new SITELLO cutlery collection, WMF Professional is showcasing for the first time, a design with a hammered finish. The delicately worked accents give each piece of cutlery its own characteristic, without disrupting the balanced lines of the traditional rounded handles.

The SITELLO Collection from WMF Professional is a further development of the traditional SIGNUM Line. With a total of 21 pieces, the new creation provides the ideal accompaniment for culinary experiences of every taste. The hammered finish emphasises the clear lines whereby the long lines, the protruding spoon bowls and the large blades complement each other perfectly. Additionally, restaurateurs can choose between the highly polished, dishwasher-safe 18/10 stainless steel version and the silver-plated version, which has a long working life.

Thanks to its harmonious contrasts, the new collection extends the range of options available to hoteliers and restaurateurs through the addition of this extraordinary but exceptionally versatile model.

We will be glad to assist if you have any queries.

Sincerely,

Raman Grover
